

TrustGate Demo — Product Requirements Document (PRD)

1. Overview

A small e-commerce backend with products, cart, orders, users, and an admin panel.

2. Functional Requirements

FR-1: Users must sign up and log in.

FR-2: Passwords must be hashed with bcrypt before storage.

FR-3: All API endpoints must be rate-limited (max 100 requests/min per IP).

FR-4: Admin endpoints must require authentication and admin role.

FR-5: Orders must only be visible to their owning user.

FR-6: Product listing must be public (no auth required).

3. Non-Functional Requirements

NFR-1: No hardcoded secrets in source code.

NFR-2: Debug mode must be disabled in production.

NFR-3: All database queries must use parameterized statements.

NFR-4: License must remain MIT.

4. Out of Scope

Payment processing, email notifications.
